

Mohammadasnaf Shaikh

Senior QA Automation Engineer · Software Engineer in Test

asnafshaikhpro@gmail.com · +1 (647) 327-6415 · linkedin.com/in/mohammadasnaf-shaikh

PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 7 years of hands-on experience delivering quality across web, mobile, API, and embedded platforms. Proven track record of building automation frameworks from scratch, integrating quality gates into CI/CD pipelines, and leading test strategy in Agile/SAFe environments. Holds ISTQB Foundation Level and SAFe Agile Practitioner 5.1 certifications. Increasingly focused on AI-augmented QA — including prompt engineering, LLM output validation, and context engineering — with practical experience validating AI-powered product features. Known for turning quality into a competitive advantage rather than a bottleneck.

CORE COMPETENCIES

- Test Automation (Playwright · Cypress · Selenium)
- CI/CD Integration & Shift-Left QA
- Defect Lifecycle Management (Jira · Xray)
- AWS S3 · Allure Reporting · Cloud Infrastructure
- Agile / SAFe Methodology
- Log Analysis (Sentry · Datadog)
- API Testing (Postman · Swagger · REST · GraphQL)
- LLM Validation & Prompt Engineering
- Accessibility Testing (WCAG · Lighthouse)
- SQL & Database Validation (DBeaver)
- Cross-Platform & Cross-Browser Testing
- Test Plan & Strategy Development

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Java, SQL, C++
Automation Frameworks:	Playwright (TypeScript), Cypress (JavaScript), Selenium, Appium
API & Performance:	Postman, Swagger, REST, GraphQL
CI/CD & Cloud:	GitHub Actions, Jenkins, AWS S3 (Allure Reporting)
Test Management:	Jira, Jira Xray, Zephyr Scale, Confluence, Notion
Monitoring & Tooling:	Sentry, Datadog, Figma, DBeaver, LambdaTest, Salesforce Admin, VS Code, Git
AI / LLM Skills:	Prompt Engineering, Context Engineering, LLM Output Validation, Chain-of-Thought Prompting, Prompt Regression Testing

PROFESSIONAL EXPERIENCE

Senior QA Engineer | DocuPet

Hamilton, ON | Jan 2025 – Present

- Architected and maintains an end-to-end Playwright (TypeScript) test suite embedded in CI/CD — delivering same-day regression feedback on every pull request and eliminating overnight test cycles.
- Pioneered AI-augmented QA at DocuPet by introducing Prompt Engineering and Context Engineering practices — built structured prompt templates, edge-case scenario libraries, and LLM output consistency checklists to validate AI-assisted product features.
- Authored comprehensive test plans spanning functional, regression, sanity, accessibility (Lighthouse/WCAG), and non-functional testing across LambdaTest real-device cloud environments.
- Led end-to-end API validation via Postman and Swagger — covering payload integrity, auth flows, error boundary behaviour, and data consistency across QA, Staging, and Production environments.
- Used Sentry for real-time log monitoring; proactively surfaced production-level anomalies pre-release and reduced mean-time-to-resolution through structured defect triage.

- Managed full defect lifecycle in Jira/Jira Xray; maintained Confluence knowledge base used for onboarding and cross-team knowledge transfer.

QA Engineer | Prodly.co

Hamilton, ON | May 2022 – Feb 2025

- Built the entire automation framework from scratch using Playwright and Cypress (TypeScript/JavaScript), cutting manual regression effort by 60%+ and enabling daily CI execution from a zero-automation baseline.
- Applied Context Engineering to structure AI-assisted test-scenario generation — crafted prompts that produced contextually accurate, domain-specific edge cases for complex Salesforce features.
- Deployed and maintained an AWS S3-hosted Allure HTML reporting pipeline — giving stakeholders self-serve, real-time visibility into execution trends, flakiness patterns, and coverage gaps.
- Served as Salesforce System Admin within QA — provisioned test environments, managed user permissions, and validated data migration accuracy for Salesforce deployments.
- Executed comprehensive API testing (Postman, Swagger) on REST endpoints, validating data correctness, response-time SLAs, and error boundary behaviour.
- Used Datadog and DBeaver for log monitoring and SQL-based database validation — ensuring alignment between backend service state and UI.

Software QA Tester | AceAge Inc.

Burlington, ON | Sep 2021 – May 2022

- Tested Karie and cMed Plus Android/iOS applications and hardware dispensing devices across QA, Staging, and Production for multiple international regions.
- Executed update path, firmware, regression, sanity, permission, and multi-device dispensing tests — catching a critical patient-safety hardware-software sync defect before it reached production.
- Performed API testing on healthcare platform endpoints via Postman; verified prescription data flows and device communication protocols.

QA Analyst | Ramp Group Technology

Markham, ON | Feb 2020 – Jul 2021

- Developed test strategies for General Motors In-Vehicle Infotainment (IVI) systems - covering Bluetooth, CarPlay, Android Auto (Wired/Wireless), Radio, SiriusXM, and media applications.
- Built Java + Selenium + Appium automation frameworks targeting Android IVI; performed both bench and in-vehicle validation using CAN bus and Intrepid simulated signals.
- Collaborated with GM engineering teams on HMI usability; structured QA feedback was incorporated into the engineering backlog across two successive model-year updates.

KEY ACHIEVEMENTS

- Reduced regression cycle by 60%+ at Prodly.co by building a Playwright framework from the ground up enabled daily CI runs from zero automation.
- Deployed the first-ever self-serve AWS S3 Allure reporting dashboard at Prodly.co, eliminating manual report distribution and increasing stakeholder trust in QA metrics.
- Authored and automated 200+ test cases across regression, integration, and end-to-end suites significantly expanding test coverage and reducing reliance on manual verification cycles.

CERTIFICATIONS

- **ISTQB Foundation Level (CTFL)** | ISTQB International Software Testing Qualifications Board (May 2026)
- **SAFe Agile Practitioner 5.1** | Scaled Agile Inc. (No Expiry)
- **Playwright - End-to-End Testing** | Udemy
- **Cypress: Web Automation Testing from Zero to Hero** | Udemy

- **Context Engineering & Prompt Design for LLM Applications** | Self-directed / Applied Practice (In Progress)

EDUCATION

Diploma Computer Programming | Seneca College

Toronto, ON | Jan 2017 – Aug 2019

- **Coursework:** OOP with C++, Java, Web Development (HTML/CSS/JS/Node.js), IT Project Management, IBM Business Computing
